

# CHIP EXTRACTOR **MG3 / MG3-ATEX**

FOR ALUMINUM CHIPS

The mobile chip extractor **MG3** collects dust and chips in a removable drivable 172 liter container.

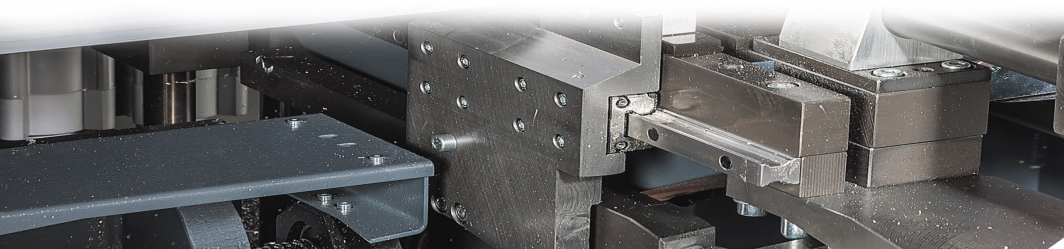

The machine has two connection inlets of 100 mm diameter and can either be run in continuous operation, or controlled by an automatic saw which has the required signal exchange capabilities.

The **MG3-ATEX** version is also capable to handle dusts and chips that are either inflammable or can deflagrate. Usable according to ATEX ZONE II 3D T135° 0:40°C

## Technical specifications:

Motor:	3 kW, 400V, 50 Hz
Air displacement:	max. 2600 m <sup>3</sup> / hour.
Suction power / noise level:	max. 30 bar / max. 80 dbA
Dimension / Weight:	HxWxD: 2.400 x 1.000 x 900 mm / 150 kg
Filter cleaning:	Pneumatic
Color:	RAL 7035 / 9016

- ♦ Movable 172 liter collection container
- ♦ Simple locking mechanism for the container through lever system
- ♦ Viewing windows in the front of the container to visually check the fill level
- ♦ Shaker unit to pneumatically clean the filter
- ♦ Simple and quick exchange of the filter unit
- ♦ Powered by a 3kW three phase motor generating 2.600 m<sup>3</sup> of air displacement
- ♦ Integrated silencer to reduce noise level
- ♦ Operable in permanent suction mode, or controlled by a suitable saw

**WELCOME TO THE WORLD OF PRODUCTIVITY**

# ACCESSORIES **CHIP EXTRACTOR MG3**

FURTHER ACCESSORIES UPON REQUEST

Connectors / reducers Ø 100 mm to 100 / 70 mm

Suction hoses Ø 70 / 100 mm,  
each 15 m long

Lifting support to empty the collection  
bin of the MG3
